

CHURCH LEADERSHIP “IN THE DIGITAL AGE”

COMMUNITY
•
DIGITAL WITNESS

I. Spreading the Gospel

The world has become smaller and emergent technology is the largest factor in this global development. Technology is fast becoming the current driving force behind what is often called the “generation gap”. Discover how this smallness in causing a large divide in our church communities.

II. Bridging the Gap

How do we use technology in bridging the generational divide and foster a greater sense of community amongst our followership and leadership? We are called to serve the first completely digital generation of Christians. Their access to information and faith formation is much different that the generations before.

III. Review of Technologies for Ministry

A careful review of the emerging technologies that can enable and enhance ministry operations and deepen the connectedness of our church communities. Live Streaming, Web Presence and Social Media are becoming mainstays in and as part of the modern worship experiences. How do we do it, manage it and not break the bank?

IV. Digital Hygiene and Our Witness

The internet is a vast ocean of ideas and opinions. It also serves as one to the gateways to our Christian faith. As much as the internet is evolving, one thing about the internet that is unchanging; it can only give back that which has been given to it. The “Net” can only reap what it has been sown.
